

THIRD QUARTER 2014 PROGRESS REPORT

Continuing our mission: OrthoWorx has made progress on several initiatives that help ensure the Warsaw region remains the **Orthopedic Capital of the World**.® We look forward to continuing to bring you future updates on our mission.

Education & Workforce Development

University | Industry Advisory Board (UIAB) - 3Q2014 included meetings of the following: Advisory Board, HR Council, Education Council, Advanced Manufacturing Council and Engagement Team. Great progress was made on the HR Council Proposal, which was approved by the UIAB and presented to the OrthoWorx Board of Directors for fiduciary approval. The proposal includes eight targeted initiatives: Experiential Learning, Orthopedic Industry Value Chain Model, Talent/Skills Gap Study, Millennial Leadership Program, Millennial Connections Group, Communication Process, Marketing to Promote Orthopedic Industry and Academic Partners and Identifying Metrics to Measure Progress.

The Mobile STEM Laboratory we supported to drive STEM education into all local elementary school was completed and put into service. Officially named the "Warsaw Inquiry Learning Laboratory (W.I.L.L.)."

Innovation & Entrepreneurship

Orthopedic Capital Research Network - Derived from the original Orthopedic Capital Clinic concept, this research model features the collaboration of health providers and the orthopedic industry to drive the regional orthopedic innovation ecosystem.

Transportation & Logistics

US 30 Coalition - The Governor's Blue Ribbon Commission recently identified the US 30 upgrade as a priority project (tier two). Interviews are underway with community leaders interview as part of the program to support an upgrade of US 30 to interstate quality between Fort Wayne and Valparaiso.

Community Enhancement

Winona Lake Limitless Park Crowd Funding Campaign - Formalized an agreement to work with a local community group to raise funds for an addition to the Winona Lake Park of the Playworld Systems NEOS 360, a highly-interactive piece of playground equipment designed to be universally accessible. Developed a plan that will include a social media crowd funding campaign and are recruiting a Grace College student to serve as an intern to support the overall campaign.

MyWarsaw.netSM - Established a committee that includes local community stakeholders to benchmark the effectiveness of our community portal, MyWarsaw.Net. The purpose is to compare and contrast metrics of their respective community-related websites to provide visitors the ultimate online experience when researching our community.

EFFECT A CHANGE.

YOU make a difference! OrthoWorx offers several ways for our donors and members to stay up-to-date with our progress and help with our initiative work.
